

The applicant Milwaukee Excellence, Inc. is a charter school established in 2015 with a growth plan to add one grade level per year. Each grade level requires 7 classrooms. A three year agreement was created to build out the infrastructure for Wi-Fi in the classrooms. This being the fourth year the administration of the school did not realize that a new 470 would need to be posted to continue the build for additional classrooms. I have been filing their E-rate requests for the past several years and informed them that Category 2 budget funds were available for additional infrastructure building. The need for a new 470 was lost in the exchange of information. When time came to file a 471 to request funding, it became apparent that the 470 was needed and not posted. So a 470 was posted, late, and now the 471 funding request is posted as well. We would like a waiver for the 470 window to allow our 470 and then the 471 funding request.
